

# LOCAL IMPACT ASSESSMENT

## CLASS 1 APPLICATION

February 2023

---

**BAGO TAVERN – LIQH424013969**

**235 High Street, Wauchope NSW 2446**

---

Level 5, 1 Castlereagh Street  
SYDNEY NSW 2000  
T: 02 9236 8588  
F: 02 9236 8599

# 1. EXECUTIVE SUMMARY

## 1.1. Outline

The Bago Tavern, situated at 235 High Street NSW 2446 (the “**Hotel**”), operates pursuant to hotel licence no. LIQH424013969 (the “**Licence**”). The Hotel is located in the Port Macquarie-Hastings Local Government Area (the “**LGA**”). The Hotel is situated in the area known as SA2 Wauchope, which is classified as Band 2 by the Independent Liquor and Gaming Authority (the “**Authority**”). The Hotel’s current gaming machine threshold is 5.

The Hotel’s licensee, Grant Perry (the “**Licensee**” and the “**Applicant**”) lodges the enclosed threshold increase application (the “**Application**”) seeking the Authority’s approval for a low-range threshold increase from 5 to 15.

## 1.2. Operation of Hotel

The primary purpose of the Hotel is the sale of liquor by retail for consumption on or off the licensed premises. The Hotel offers its patrons a range of facilities including: a public bar, bistro, beer garden, takeaway liquor and gaming. The approved gaming machines are operated in a discrete internal gaming room within the Hotel. The profit derived from gaming is important because it assists in financially supplementing the variety of other services and facilities offered by the Hotel to its patrons.

## 1.3. Location

The local community, for the purpose of the Application, is the suburb of Wauchope (the “**Local Community**”), which forms part of the Port Macquarie-Hastings Council LGA (the “**Broader Community**”). The Hotel attracts a mix of patrons from inside and outside the Local Community.

## 1.4. Gaming Harm Minimisation

The Hotel is aware of the potential harm of providing gaming services to the public and observes diligently the harm minimisation provisions of the *Gaming Machine Act 2001* (the “**Act**”) and *Gaming Machine Regulation 2019* (the “**Regulation**”). As an indication of the Licensee’s intention on continuing as a best practice operator, the Hotel will introduce several additional harm minimisation strategies that go above and beyond the requirements of the Act and Regulation. The Applicant is conscious of, and sensitive to, the issue of problem gambling. By lodging this Application, the Applicant does not seek to change the business philosophy of the Hotel, which will remain focused on being the social destination for the Local Community.

## 1.5. Positive contribution

The Hotel is already an important contributor to the local community. However, if the Application is approved, the Hotel will provide financial assistance in the sum of \$128,223.38 (over 5 years of \$25,644.68 per annum) to the Responsible Gambling Fund.

## 2. ABOUT THE HOTEL

### 2.1. Size

The current licensed floor area of the Hotel is approximately 875m<sup>2</sup>. The current floor area of the gaming room is approximately 25m<sup>2</sup>. A copy of the floor plan is annexed and marked "A".

### 2.2. Other facilities

The Hotel is situated in the suburb of Wauchope, approximately 20km inland from Port Macquarie. As such, the Hotel provides a community orientated traditional pub offering for residents or workers within the Local Community. The Hotel is also conveniently located on the Oxley Highway, which connects far western NSW towns such as Nevertire, Coonabarabran and Tamworth with the east coast. Accordingly, the Hotel also seeks to attract visitors and tourist who may be travelling to or from western NSW.

The Applicant, through related trading entities, has recently purchased the Hotel's freehold and business. It is submitted that the Applicant and the Hotel's new business and premises owners, are very experienced hotel operators.

The Applicant intends to undertake significant refurbishment to the Hotel's facilities in the future. While it is still in the early stages of planning, these renovations will likely involve the refurbishment and fit-out of the Hotel's bar and bistro areas. This will provide much needed refurbishment to the Hotel's current offerings, further strengthening its position as destination venue for the Local Community.

Notwithstanding the recent change in operator, the Applicant will continue to host several regular community focussed events, including trivia nights, ladies nights, live entertainment, dance nights, live sport and discounted daily meal specials. In addition, the Hotel hosts regular private functions, providing a space for the Local Community to celebrate special events and milestones.

The revenue derived from the Hotel's gaming services is vital. However, to keep matters in perspective, it is important for the Authority to understand that gaming generates the smallest revenue stream of all the Hotel's facilities. This is demonstrated by the below percentage-breakdown of the Hotel's revenue:

- Bistro (53%);
- Bar (42%); and
- Gaming (5%).

### 2.3. Current gaming machine threshold and Trading Hours

The Hotel's current gaming machine threshold is 5 and it operates a corresponding number of gaming machines. The Hotel's gaming room has approved trading hours of 05:00am to 12:00 midnight (Monday to Saturday) and 10:00am to 10:00pm (Sunday). The Hotel is subject to a 6-hour gaming shutdown of 04:00am to 10:00am (Monday to Sunday). Accordingly, this Application is not a late-night gaming application, as defined by the Authority's guideline 16 - late-night gaming applications ("**Guideline 16**").

### 3. ABOUT THE COMMUNITY

#### 3.1. Socio economic data

The Applicant reiterates that the Application is not a late-night gaming application. Consequently, additional considerations prescribed by Guideline 16 are not activated. Nevertheless, in order to satisfy the Authority that the Application is consistent with the objects of the Act, the Applicant has, among other things, had regard to Guideline 16. In relation to the socio-demographic risk factors, the Applicant responds as follows:

- i. people who identify as **Aboriginal and Torres Strait Islander** people are overrepresented in the local community (9.8%) and broader community (5.5%) compared to the NSW average (3.4%);
- ii. people who speak a **language other than English** at home are underrepresented in the local community (3.9%) and broader community (5.4%) compared the NSW average (29.5%);
- iii. a lower **average weekly household income** in the local community (\$1,175) and broader community (\$1,263), compared to the NSW average (\$1,829);
- iv. a lower **rate of Bachelor Degree attainment** in the local community (8.4%) and broader community (17%) compared to the NSW average (27.8%);
- v. a higher **rate of Certificate Level IV attainment** in the local community (4.9%) and broader community (4.5%) compared to the NSW average (3.3%).
- vi. a higher **rate of unemployment** in the local community (5.8%) compared to the broader community (4.8%) and the NSW average (4.9%).
- vii. a higher **rate of households owned outright** in the local community (36.6%) and broader community (42.5%) compared to the NSW average (31.5%).

The above statistics demonstrate that there may be at-risk groups residing in the local or broader community; as there are in most communities. The Applicant asserts, however, that these “at-risk” groups do not, in the main, form part of the Hotel’s patronage. This is further addressed and explained in paragraphs 3.3 and 4.3 below.

#### 3.2. Localised data in relation to gambling participation

The Applicant submits that, to its knowledge, localised data in relation to gambling participation and problem gambling prevalence in the Local Community is not publicly accessible. It is noted, however, that the *NSW Gambling Survey 2019* (the “2019 Survey”) provided data relating to the Problem Gambling Severity Index (“PGSI”) in rural and regional NSW districts. The PGSI provides a standardised measure of at-risk behaviour in problem gambling.

The 2019 Survey found that only 2% of gambling participants were problem gamblers in the Mid North Coast District. This is equal to the overall average of both regional and metropolitan NSW districts. Additionally, percentages of moderate and low risk gamblers within the Mid North Coast District were not identified as significantly different from the rest of NSW. There appears to be no statistical variance in the Broader Community’s localised data in relation to gambling participation. This is further supported by Liquor & Gaming’s most recent gaming machine profit report, which ranked Port Macquarie-Hastings Council 38<sup>th</sup>. This is consistent with the Broader Community’s ranking as the 28<sup>th</sup> largest local government area in terms of population. Additionally, the Hotel was ranked 1,043 in NSW, by net profit per gaming machine. A copy of the gaming machine data is annexed and marked “B”.

At the time of preparing this Local Impact Assessment, the Authority's Live Data site remains unavailable. As such, the exact cluster of hotels cannot be determined. Notwithstanding, in circumstances where there is only one other licensed hotel in the Local Community, the Applicant submits that the Authority can be satisfied that the Local Community does not have a cluster of hotels offering gaming facilities

### **3.3. Gaming patron demographic**

The Applicant submits that the Hotel's gaming patron demographic is primarily male between 25 and 65 years old. Because the Hotel has positioned itself in the market largely as a community focused, family friendly hotel, a significant percentage of its patrons reside or work in the Local Community.

The Applicant submits that patrons most frequently utilise the gaming facilities pre or post dining in the Hotel's bistro. This position is supported by the Hotel's hourly turnover report for gaming.<sup>1</sup> Upon review of the report, it is apparent that the hotel experiences a regular uptake in gaming turnover between approximately 5:00pm and 8:00pm. This coincides with the operation of other facilities offered at the Hotel, such as the bistro. The Applicant submits that these are examples of how the operation of gaming is very much ancillary to the other facilities and services offered at the Hotel.

The Applicant submits that it is unlikely that the addition of 10 gaming machines would entice problem gamblers from other hotels or clubs – and nor is it the Applicant's desire or intention to do so. In essence, the Applicant's business philosophy is holistic in that gaming is but part of a wider range of facilities offered by the Hotel for the enjoyment of existing Hotel patrons. This is supported by the small revenue stream that the Hotel derives from gaming in comparison to its other facilities (5% of total revenue). Additionally, none of the multi venue self-exclusions relevant to the Broader Community have been initiated from patrons at the Hotel.

The Applicant does not believe that the granting of this Application would attract problem gamblers to the Hotel. On the contrary, the Application is driven by the need to satisfy the Hotel's existing patrons who are already at the Hotel enjoying its other facilities.

## **4. RESPONSIBLE GAMBLING MEASURES**

### **4.1. Compliance with the Act and Regulation**

As a responsible licensee, the Applicant takes seriously its responsibilities to comply with both the Act and the Regulation. Accordingly, the Hotel, at all times, complies with its legislative and regulatory obligations. The Applicant is not aware of any gaming related incidents over the previous years.

In addition to compliance with the relevant Act and Regulation, the Hotel will introduce, should this Application be approved, a comprehensive Gaming Plan of Management ("Gaming POM"). A copy of the Hotel's Gaming POM will be provided upon request.

---

<sup>1</sup> A copy of the Hotel's turnover report will be made available in commercial-in-confidence, upon request.

#### **4.2. Above and beyond gaming strategies**

The Independent Liquor & Gaming's guideline 16 – late-night gaming applications, states that “the Authority will look more favourably upon late-night gaming applications where a venue has implemented or proposes implementing strategies to prevent and reduce gambling harm beyond the minimum legislative requirements”.

The Applicant reiterates that this is not a late-night gaming application. Nevertheless, the Applicant has offered to adopt the following strategies in its Gaming Plan of Management, should the Application be approved:

- i. Gambling harm minimisation measures will be discussed with staff members during the Hotel's regular staff meetings. The purpose of these meetings is to ensure that all managers and staff who are involved with the provision of gambling receive refreshers to assist them identifying, approaching and managing patrons showing signs of risky and problematic behaviour. The meeting's agenda will include:
  - (a) Reminding staff of the importance of patron welfare. This includes communication skills training on approaching at-risk patrons.
  - (b) Reiterating the procedure for identifying signs of problem gambling and the necessity of reporting the signs to the Licensee/manager (as described in the coloured categories above).
  - (c) Additional staff training for identifying and approaching at-risk patrons.
- ii. Information about local gambling support services will be displayed throughout the Hotel.
- iii. Managers will be regularly present in the gaming machine area throughout the gaming room's trading hours to promote welfare checks and encourage patron interactions.
- iv. The Hotel will ensure that patrons are made aware of the availability of gambling counselling and will promote gambling counselling in welfare checks and at-risk conversations with patrons.
- v. Introduction of a gaming incident register.
- vi. The Hotel will ensure that gaming and liquor self-exclusions can be submitted onsite at all times when the Hotel's gaming machines are available for use by patrons.
- vii. Complaint handling and misconduct procedures. If a patron wishes to make a complaint about the Hotel's RCG practises, that complaint is to be recorded in the Hotel's gaming incident register and information provided to the customer about how and to whom that complaint may be made.
- viii. The introduction of a responsible gambling officer.
- ix. Regular self-auditing of the Hotel's gaming compliance.

#### **4.3. Mitigating factors**

In addition to the proposed harm minimisation strategies, the Applicant submits that any potential risk arising from the grant of the Application is mitigated by the following factors:

##### *i. Gaming demographic*

As referred to above, there is no evidence to suggest that there is a higher presence of problem gamblers in the Local Community compared to the NSW average. Additionally, the gaming room is most popular with patrons who have attended the Hotel for its other facilities, particularly the bistro. These patrons mostly reside or work within the Local Community and frequent the Hotel regularly.

It is the Applicant's experience with community focused Hotels in regional towns that staff are able personally get to know many of the patrons, leading to the development of a strong rapport with many of the "regulars". The benefit of this is that unlike busier local communities and venues, staff are able to become familiar with a patron's normal behaviour and can more readily identify and monitor a patron with a potential problem gambling habit.

The Applicant submits that problem gamblers who reside in the Broader Community (if any) are more likely to frequent hotels or clubs that have a greater focus on gaming and, therefore, offer significantly less facilities than the Hotel.

##### *ii. Modest trading hours*

The Hotel's gaming room has approved trading hours of 05:00am to 12:00 midnight (Monday to Saturday) and 10:00am to 10:00pm (Sunday) - subject to a 6-hour gaming shutdown of 04:00am to 10:00am (Monday to Sunday). Accordingly, this Application is not a late-night gaming application, as defined by the Authority's guideline 16 - late-night gaming applications.

##### *iii. Proportion of gaming revenue*

The Hotel's gaming facilities provide a small revenue stream in comparison to its other facilities (5 % of total revenue). This supports the position that the Hotel's gaming operates ancillary and discretely to its other facilities.

##### *iv. Existing availability of gaming machines within the community*

The Application is made for an increase to the Hotel's gaming threshold by 10. The Wauchope SA2 currently has 137 gaming machine entitlements. This application represents an approximate 7.3% increase in available gaming machines across the Local Community. Contextually, it is submitted that this Application, were it to be granted, would represent a negligible increase in the number of gaming machines in the Wauchope SA2. It follows that there would not be any discernible detrimental effect on the Local or Broader Community flowing from the grant of the Application.

v. *History of compliance*

The Applicant submits that it has a long and outstanding record of compliance with both gaming and liquor legislation. It is submitted that this demonstrated long history of compliance will satisfy the Authority that it can grant the Application, safe in the knowledge that the Applicant is a best practice operator who will continue to operate the Hotel to the highest standard.

vi. *Acquisition of gaming machine entitlements*

The Applicant is awaiting the determination of this Application before deciding the source of the incoming gaming machine entitlements. However, the Authority would acknowledge that, if this Application is approved, the Applicant will acquire 10 gaming machine entitlements and forfeiture is likely to occur.

## **5. BENEFITS OF THE APPLICATION**

### **5.1. Responsible gambling fund**

The Hotel is aware that problem gambling is an issue and can heavily impact on a person's life and family, although the Hotel itself has not experienced any specific issues. The Applicant is seeking a small increase to its gaming threshold and submits that if there is any impact, it will be negligible.

Notwithstanding the negligible impact, the Applicant proposes to make a donation to the Responsible Gambling Fund in the amount of \$128,223.38 over a period of 5 years (\$25,644.68 per annum).

The Responsible Gambling Fund helps support responsible gambling and minimisation of gambling related harm in communities across NSW. This objective is achieved through several measures, including:

- research and review of responsible gambling policy;
- communal education on responsible gambling choices, behaviour and resilience;
- the provision of counselling services including the growth of online support initiatives; and
- regulatory oversight of responsible gambling obligations and practices.

### **5.2. Local community sponsorships**

The Applicant understands that the Hotel's previous owner supported several community groups in the Local Community. The Applicant will, subject to this Application being granted, continue to expand its investment into local sporting, community and social groups.

In its first year of operating the Hotel, the Applicant anticipates donating \$37,200 directly to the following local organisations:

- Kneumo Foundation - \$5,200
- Long Flat Dragons RLFC Mens & Women's Teams - \$10,000
- Starlight Foundation - \$3,000
- Wauchope Palliative Care Unit - \$5,000

- Wauchope Blues Junior Rugby League – \$1,500
- Wauchope Touch Football - \$1,000
- Hastings River Greyhound Club - \$,1000
- Bago Tavern Amateur Fishing Club - \$1,500
- Wauchope Mens Shed – \$1,000
- Wauchope/Bonny Hills SLSC \$2,000
- Wauchope Tennis Club - \$500
- Wauchope Show - \$1,000
- Riding For the Disabled - \$1,000
- Wauchope Soccer - \$1,000
- NSW RFS – Wauchope Brigade \$1,500

The Applicant expects to expand on these sponsorship opportunities in the Local Community.

### **5.3. Continued development and refurbishment**

As previously mentioned, through related trading entities, the Applicant has recently purchased the Hotel's freehold and business. It is the Applicant's intention to undertake significant refurbishment to the Hotel's facilities in the future. While it is still in the early stages of planning, these renovations will likely involve the refurbishment and fit-out of the Hotel's bar and bistro areas.

These works reflect a substantial investment into the continued renovation and modernisation of the Hotel. It is submitted that gaming revenue will play a role in funding the Hotel's upgrades. If approved, this Application will enable the Hotel to generate additional revenue from gaming. Accordingly, the Applicant anticipates that the Hotel will be positioned, as a result of this Application, to upgrade the Hotel's facilities into the future.

### **5.4. Local employment**

The Hotel currently employs 20 staff across the following roles:

- chefs.
- Kitchen hands.
- Managers.
- Bar and bistro attendants.
- Gaming room attendants.

If approved, the Application will enable the Hotel to continue to expand its future employment opportunities.

## **6. CONCLUSION**

Pursuant to section 34(1) of the Act, the Applicant has applied to the Authority to increase the gaming threshold.

This Local Impact Assessment is required pursuant to section 35(3)(b) of the Act, because the Hotel is situated in a Band 2 LSA and the application is for a low-range increase in its gaming machine threshold.

The Applicant is aware that, pursuant to section 36(1) of the Act, the Application cannot be approved unless the Authority approves this Local Impact Assessment. Similarly, the Applicant acknowledges, pursuant to section 36(3), that the Authority may approve this Assessment only if it is satisfied that it:

- (a) complies with the requirements of Part 4 Division 1 of the Act and the Regulations relating to the Local Impact Assessment;
- (b) demonstrates that gambling activities will be conducted in a responsible manner;
- (c) demonstrates that the increase to the gaming machine threshold will provide a positive contribution towards the local community of the Hotel; and
- (d) addresses community concerns arising out of the consultation process.

It is the Applicant's contention that the Authority will be satisfied as to (a), (b) and (c) by the content of this Local Impact Assessment and to (d) through such further actions the Applicant takes if and when community concerns are raised.

The Applicant will, of course, respond with alacrity to any requisition raised by the Authority in relation to the Application.
