To: Liquor Law Review <liquorlawreview@justice.nsw.gov.au>;

As a registered nurse of over 30 years, I have seen the absolute worst of alcohol fuelled violence, both on the street and in hospital ED departments...the effects of alcohol, both short term and the long term are nothing short of frightening...the overall long term effects of alcohol will live with us for a very long time and have a huge impact on our health system...effects of alcohol on liver disease, domestic violence, diabetes, foetal alcohol syndrome. The list goes on. So it is not just the short term effects we should be thinking of.

The laws do not go far enough, and certainly could be improved even more.

The decrease in violence could be just a start, and hopefully will decrease even further

Regards,

Lynne Walters

Nurse
