

Dear Sir/Madam,

The intent of the measures is noted. It is also understood that there are concerns about revenue impacts concerning the 10pm sales curfew.

Late night drinking and associated anti-social behaviours are of concern to community. A curfew cannot be relied upon as a single measure to reduce problems associated with late night drinking. In this regard, it may be something that needs to be implemented in conjunction with other measures such as education, taxes etc and regularly re-evaluated to ascertain if the curfew should be removed.

The removal of the curfew should be based on not only feed back of business proprietors but be weighed up against other factors taking into account data / information collected by the NSW Police.

Regards,

Cathy Bern
