

The state government has killed our nightlife with over regulation and the lockout laws. 99 % of adults drink responsibly, yet these laws punish everyone. We are no longer trusted by the State Government to go out at night. The compliance on licensing is too strict. I want to see a reduction of alcohol fueled violence, but not by over policing. People are simply sick and tired of being harassed by security in bars and pubs for doing absolutely nothing wrong. We need to have a serious rethink how we make our cities safe and vibrant at the same time without violating our personal freedoms.
