Hello

Negatives to lockouts-

- everyone pre drinks at home which means they are drunker people earlier in the night walking the streets
- everyone predrinks which means there could be more drink drivers earlier in the night when families are out driving around home suburbs
- most of the drunks are on the street all at once instead of being filterd out slowly during the night.
- killing clubs and pubs many buisneses will close due to lack of buisness
- there still will be fights on the street. Look at albury, they have had lockout for years and its dangerous to walk around at night there they even have to have security at food places. Most of the clubs and pubs have shut down so everyone is forced to try and get into the one place.
- if anything move the lock out time to 3am by then everyone kniws where they want to be and they will be less people on the streets all at once

Positives

- none
