This is a farce. The reasons behind these laws as portrayed by this government and the media are blatant lies, the statistics false and the outcomes inconsequential.

Please consider the effect on the industry, the employees and their families. 9-5 workers are not the only vote - and it is clear that you are not listening to the public.

This oppression against human rights is obvious and this Orwellian approach is reducing sydney to an international laughing stock. Our arts and culture and reputation as a international city are suffering - to the detriment, not only if the city as a whole but to the impression we are giving to the rest of the world.

Please wake up, open your ears and listen to the citizens.
