What a joke!

Please create a law system for those who are guilty - not for the innocent like us that should be able to choose when, where we go out.

Compensation should be paid to all those affected by this draconian measure.

Why can't we have one place that is crazy busy and easier to police? They should of left 1 police cars on each of the 3 corners in kings cross Friday and Saturday night with police holding riffles - just how they did it at the Brazil World Cup. No issues then and fix public transport - promote Uber growth.

Less compliance generally would be better.

Unfortunately so many people have been destroyed by this, but please return the country back to the innocent people please.

We don't live to work only which is why we are so angry - we need to relax and socialise and let the creatives /musicians survive.

Warm Regards

Tim Dixon
