To whom it may concern,

This is a short email to voice my opinion that the lockout laws are detrimental to Sydney and its people.

They are ruining our economy by closing down businesses.

They are destroying jobs.

They are taking away our freedoms.

They have made this Sydney boring and I personally can attest to 8 of my top 8 best friends who have now left Sydney to pursue better/more interesting/progressive cities in Europe and the Americas.

These laws have made the city more dangerous for individuals (if I make a choice to go out at night I am now 15% more likely to get assaulted) even though overall assaults have dropped purely due to a drop in foot traffic.

The mining boom is over and we need to maintain every industry we can including the night time economy and tourism industry.

As a tax payer, engineer building Australia's future and respected member of our society I am pleading with you to reconsider the lockout laws and remove them completely and focus your attention to other more logical solutions to the issues at hand.

Thank you

Kind Regards,  
Chris Dogulin
