Do not roll back the current alcohol laws. The current laws are working with a 32% reduction in assaults alone. If you roll back these laws it will show just how little respect the state government has for our emergency personnel namely our Police & Ambo's not to mention our Doctor's & Nurses. While you are home with your family these professional people are out dealing with these drunken scumbag's putting other lives at risk. You shouldn't even be considering rolling back the current law's you should be making them even tighter or does the government rely on handouts from the alcohol industry & are being pressured for a roll back??? Show some ball's act now it could be your son or daughter that cop's the next "Coward Punch"

Regards,

Neil Ellem
