We need to live in a city where we can feel safe. As a society we need to move from the view that you need to consume vast amounts of alcohol to enjoy yourself. There never used to be extended hours of serving alcohol and it is clear that this culture is not working and the evidence has shown that the restrictions are working so "don't fix it if it ain't broke". I believe that restrictions across the state would be simpler and fairer to businesses that serve alcohol, so be courageous and not only keep the laws in place but extend them to improve our society.

Regards,
