Submission to the review of alcohol

My observation is that the present law is working in that the violence caused through alcohol abuse has declined. If anything it could be improved but not altered to allow the situation to return to previous lack of control opening a path to an escalation to more violence. My family are police officers having to deal with these incidents along with ambulance and hospital staff who shouldn't have to be put into these situations arising from alcohol fuelled violence. Keep our streets safe for all.

Regards,

Beverley Fletcher
