To: Liquor Law Review <liquorlawreview@justice.nsw.gov.au>;

The more that alcohol is available late at night, the more people are likely to be out and drinking past what is good for their health and their behaviour.

If venues are closed, people are more likely to go home and to be safer.

A lot of the fights, assaults etc that occur are late at night-in our area two groups of teens at midnight, an assault at a service station at midnight where you people were involved. Maybe young people would be safer at home-you can have a good time without getting drunk and without staying up until the early hours of the morning. Businesses can be proactive in making changes-they can create more family-friendly environments and safe places to socialise and diversify. We need to change this culture of needing to have access to alcohol to feel that we're having a good time.

Thanks.

Regards,

Terry Georgeson
