To: Liquor Law Review <liquorlawreview@justice.nsw.gov.au>;

Not only is the whole lock out law a complete farce geared around making money for a small group of people dressed up as protecting the public, it also doesn't even 'solve' anything violence related. It has just pushed the trouble makers else where (of which there will always be some until the end of time). If there was a genuine intention to protect the public then the focus would be on drug ridden, gang run places like Mount Druitt and Punchbowl, but no one wants to develop there so they just get left to get on with it while precious resources and tax payers money are spent on ridiculous and ineffective measures in the CBD and surrounding suburbs (15 coppers and 2 dogs in a ghost town of Kings Cross anyone?)

Most if not all other leading capital cities of the world have buoyant night life with places open for people to enjoy until their hearts content and they have no more trouble than we have here, it could be argued that some of them have significantly less. London, Paris, Amsterdam, New York, Miami, Barcelona, Lisbon, Bangkok, MELBOURNE for god sake- none of whom have anything like the draconian and nanny state laws that have crept in here over the last few years.

Its ridiculous, overtly corrupt and embarrassing on a global scale. Please learn from and follow the rest of the western world and stop this nonsense immediately.

Yours sincerely

Andy Hardwick
