To whom this may concern,

I feel the lockout law does not do what it was intended to do. That our premier is forcing his personal idea onto the people of NSW and restricting out creative community from flourishing. Our premier needs to understand that the lockout law does not just affect the bars and clubs but also the business surround it - many friends of mine has lost their job due to closure of business around the lockout areas. I feel if he wants to continue the lockout law that the casino should be included as it does not seem fair and there are many statics to show ill affect excluding the casino can do the family, domestic violence victims and gamblers. Mike needs to look at the real facts and not selectively read what he wants see and hear and listen to the people of NSW.
