I have seen the changes in the clubs and Sydney streets late at night. Communities are safer, less alcohol fueled violence. And we need to continue to keep our police, nurses, doctors and paramedics safe. I have family in the police force and nursing, they have noticed the difference. Lets not destroy all of the good work to date. People and safety first ! Partying, alcohol and violence doesn't even make the list of important things in life! Put this to bed, keep it in place permanently and move on to the next problems, ICE addicts harming our health care professionals and police. Keep the ball rolling.

Regards,

Iain McCrae
