Live music and dj's are a huge part of my life. It is what makes me passionate about the city.

Live venues and underground clubs are as important to me as cinemas, sports stadiums and theatres. Please don't compromise them. Nightclubs and music venues have brought a terrific richness to my life. Dj and soundsystem culture has made me many friends and coexisted as a peaceful, respected passion of all my close friends. Devoted music lovers and performers should not have their freedoms confounded. People should be able to enjoy and share music that thrives at night.

I am a peaceful person and have never wanted to hit anyone on a night out. This is common place. Music brings people together, let the city share and grow its culture, please don't suppress it.

Regards,

Edward.
