To whom it may concern

I am an adult... I pay taxes, I don't break the law and enjoy a night out with friends and work colleagues and ever since that lock out law began to slowly strangle the life out of my city I am now accustomed to a dead city, no night laugh and constant messages from friends and family overseas asking the same thing... What has happened to Sydney? The lock out laws have ruined this city's culture, ruined lives and jobs and 3 close friends of mine and only 1 of them was in hospitality. Remove the lockout laws and also remove this corrupt government who seem to give nothing but green lights to any one with a casino!

Thank you
