Sydney's lockout laws are corrupt and un-ethical in fairness of law, and set to maximum disruption to our live musicans, businesses and venues at which our city thrived on once.

No one will dismiss the corruption and lies told to our public with reasons as to why a gambling house of epic proportions is allowed to operate outside the lockout laws when small business of decent trade ethics cannot! Star city casino is rigged and corrupt in so many ways and state leader Mr Baird has his pockets open.

End these lockout laws - work to enforce more diverse strategies against violance, drinking and drugs. Seek opinion broadly, research the worlds best model cities. But please don't kill business, culture, talent, artists, young people, old people and the community abroad with dark and stupid laws.

Keep Sydney Open.

Andrew
