Having seen the old and the new, having worked all over the state and currently working at Surry Hills, having seen licensing done well and licensing done very badly, the only responsible decision would be to retain the lockout laws as they are now. The only improvement to that would be extending these laws state wide so that every drunken jibberer knows that they can no longer wander from venue to venue causing grief to the community.

The notion of businesses failing is manufactured tripe to allow dodgy licensees and promoters to make a huge profit with scant regard for the community. Theses laws are the best thing that could have happened for any of the good licensees and promoters as they have a captive audience during the wee small hours and nowhere near the problems.

Regards,

Keith Ryan

Police Officer
