I write in opposition to the Sydney Lock-out Laws.

If Sydney wants to be a 24 hr city and World destination it needs people to work any number of shift patterns. There's no such thing as 9:00-5:00 anymore.

People who work until midnight or later should not be made victims of draconian, politically motivated, knee jerk legislation. If you are not inside a venue by 01:30am you may as well go home - or go and drink, smoke, gamble at the casino...!

If the venue you are now committed to is not to your liking - tough. Go home. Because you won't get in anywhere else... except the casino where you can drink, smoke and gamble 24hrs a day...!

Surely this injustice bordering on corrupt government action is so obvious it cannot be allowed to continue.

Violence in society is not confined to the CBD after 1:30am.

There are ways to reduce violence, and make for safe late night social activities and economies without endless legislation and regulation...

Thank you.
