To: Liquor Law Review <liquorlawreview@justice.nsw.gov.au>;

Please don't go back on your alcohol laws that places very modest limits on hours and availability of alcohol. I am an educator of 42 years, and have seen over the years the permanent brain damage and impaired cognitive function as a result of alcohol use and abuse. More recent research indicates that neuron pathways are still developing in the early twenties, thus the less opportunities for alcohol consumption the better the possibilities for optimal brain function of our children and grandchildren. Let's work together to protect our nation's most precious and valuable heritage - the thinking abilities of the next generation.

Regards,

Carol Tasker
