This country has fallen far from what it was, we are now a disgrace, a nanny state and it's disgusting, the politicians are corrupt and keep making things worse and worse. If you keep taking away our rights to be free and to live, do you think we will take it on the chin? No the people will stand up things will get out of hand so before they do why doesn't the government have along think about being fair for a fucking change and stop being a pack of dirty corrupt shit eating cunts. Sorry for the language.
