Having seen this type of violence first hand,I can only implore you to not only keep the laws intact but increase them. Not only for the sake of the victims but all allied health workers, police and paramedics. A work colleague of mine is currently being treated for PTSD following a number of assuts while attending alcohol fueled violent situations, he to is a victim! of senseless violence.

I am now retired and can only say that after 25 years in the Ambulance Service I am thankful I no longer have to personally deal with these intoxicated people.

Regards,

Charles Watkins

Paramedic
