I believe that the lockouts have unfairly targeted and disadvantaged small businesses and the creative community. The exemptions for the casinos are completely unacceptable from a corruption point of view and the hypocrisy of our governments stances on pokie machines would be laughable if it weren't for the destructive effects they have on our society. I hope and expect that these issues with the lockout laws will be represented in the upcoming review in a fair and non-bias manner, as our state continues along the path of corruption many of the previous governments have laid out before us.

Thank you Mr Callinan
