Subject: suggestion 6.6

Hi

In terms of your Regulatory Impact Statement, part 6.6 : Harm Minimisation Strategies.
Is there any reason you can't buy non alcoholic beer in pubs in Sydney? It is something that is easily bought in pubs in London, Berlin and New York. With the focus on how alcohol is consumed in Sydney, it would be an obvious and easy addition to harm minimisation.

There are a plethora of bottled german non alcoholic beers which appeal to folks who have a beer tooth instead of a sweet tooth. Also to be honest; if you quietly feel like not drinking of an eve or just having one alcoholic beverage then stopping, it is a lot easier to do if you are drinking something that looks like a beer.

Kind regards

Pip
